

Sequencing: Locating and Treating Shock in the Body (Intermediate Course)

Date: March 14, 2023

Location: The Broadmoor

Course Director: Charles Beck, DO, FAAO

Register online at www.academyofosteopathy.org

Course Description

When a patient comes to see you that has already been to see more than one other qualified practitioner, they are likely telling you that their body is in shock. This shock is different than hypovolemic, neurogenic or septic. This shock restricts movement in planes of motion (and thus affects the whole body). This shock prevents treatments (even osteopathic ones) from working. Learn how to identify the five different types of shock (including the one that Dr. Fulford described), which planes of motion that they hinder and how to rapidly treat them and restore movement in the body. Previous knowledge of the sequencing method of screening the patient is required.

Course Goals & Objectives

- Dural Shock (flexion/extension restriction)
- Fulford's Shock (side bending restriction)
- Axial Shock (rotation restriction).
- Midline Shock (translation restriction).
- Abdominal Shock (lumbar restriction).

At the conclusion of the course, the student can demonstrate more than one diagnostic approach to locate the types of shock.

Prerequisite

As an intermediate course, anyone who has either taken a sequencing course or who has been taught sequencing at their COM can attend. This course is open to students, physicians, dentists and any other allied health professional that the AAO is allowed to teach. Any physician specialty is allowed to attend.

Continuing Medical Education

4.25 credits of AOA Category 1-A CME anticipated

Course Location

The Broadmoor
1 Lake Avenue, Colorado Springs, CO 80906

Course Dates & Times

- March 14, 2023 1:00pm-5:30pm

Meal Information

Coffee and tea will be provided. Breakfast and lunch are on your own.

Course Director

Charlie Beck, DO, FAAO graduated from the Pikeville College School of Osteopathic Medicine (now the University of Pikeville) in 2004. He was one of Pikeville's first undergraduate fellows, staying an extra year in medical school to study osteopathic manipulation more in depth. Taught by Edward G. Stiles, DO, FAAODist, Charlie was

given an excellent foundation for learning manipulative medicine. He is the first resident in Neuromusculoskeletal Medicine in the history of his hospital and his state (Westview Hospital in Indianapolis, Indiana).

Charlie has taken numerous classes across the US and Canada and is skilled in multiple techniques and modalities. He has taught courses and given presentations here in the U.S. for the American Academy of Osteopathy, the Osteopathic Cranial Academy, the Indiana Academy of Osteopathy, and numerous medical schools. He has also taught in Canada, Japan, Eastern and Western Europe as well as in Australia and New Zealand, where he works yearly as a locum osteopath. He is the president of the Indiana Academy of Osteopathy and a member and lecturer of the ALF InterFACE Academy. He is a published author and researcher. As his learning deepens by working with others he is always searching for the commonalities between different practitioners and healing styles. This has allowed him to bring together osteopathy with dentistry and vision to give a unique perspective on your illness/injury. He continues to strive to integrate this learning into principles that are easily taught to others. His primary practice is in Lebanon, IN.

Registration Fees

	On or before January 11, 2023		January 12 through February 23, 2023	
	With Convo	Without Convo	With Convo	Without Convo
Academy member *	\$162	\$180	\$252	\$280
Nonmember DO, MD, or other healthcare professional	\$117	\$130	\$207	\$230
Student Members	\$90	\$100	\$117	\$130
Nonmember practicing DO or other health care professional	\$522	\$580	\$612	\$680
Nonmember resident or intern	\$470	\$522	\$567	\$630

* The AAO's associate members, international affiliates and supporter members are entitled to register at the same fees as full members.
